Transforming Businesses Through Salesforce Innovation & Digital Excellence

Salesforce Consulting | AppExchange Apps | Mobile Experiences |
AI Automation | Product Engineering

[INVESTOR / CLIENT-FACING OVERVIEW](#)

About Adoptforce

A strategic Salesforce and digital engineering partner focused on secure, scalable, business-aligned technology execution.

Client-first culture with end-to-end ownership across consulting, delivery, engineering, adoption and support.

Mission

Help businesses turn Salesforce and modern software into measurable growth, efficiency and customer experience gains.

Vision

Become the trusted digital transformation partner for teams building the next generation of CRM, mobile and AI-enabled operations.

Delivery

Local consulting with global execution, flexible engagement models and follow-the-sun support.

40+

satisfied clients

100+

projects delivered

400+

years combined experience

Positioned for organizations that need speed, enterprise rigor and Salesforce ecosystem expertise.

WHAT WE DELIVER

Core Capabilities

Integrated services that move from strategy to architecture, product delivery and long-term optimization.

Salesforce Services

Consulting | Sales Cloud | Service Cloud | Experience Cloud | Marketing Cloud | CPQ | AppExchange Apps

GTM Strategy

Product positioning | RevOps | Sales enablement | CRM optimization | Acquisition strategy

Mobile App Development

iOS & Android | Mobile SDK | Native / hybrid | Cross-platform | Offline-first apps

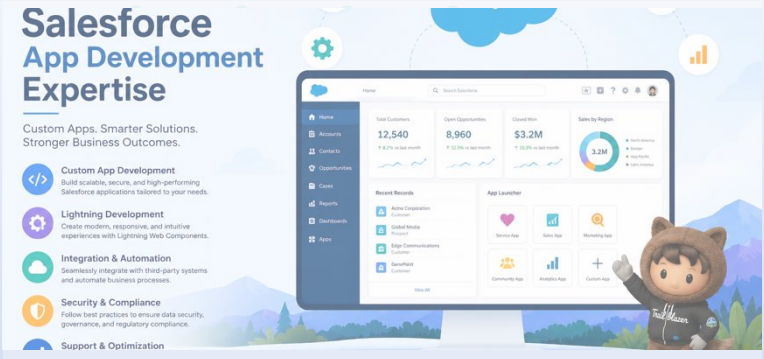

AI & Automation

Workflow automation | AI insights | Einstein AI integration | Process optimization

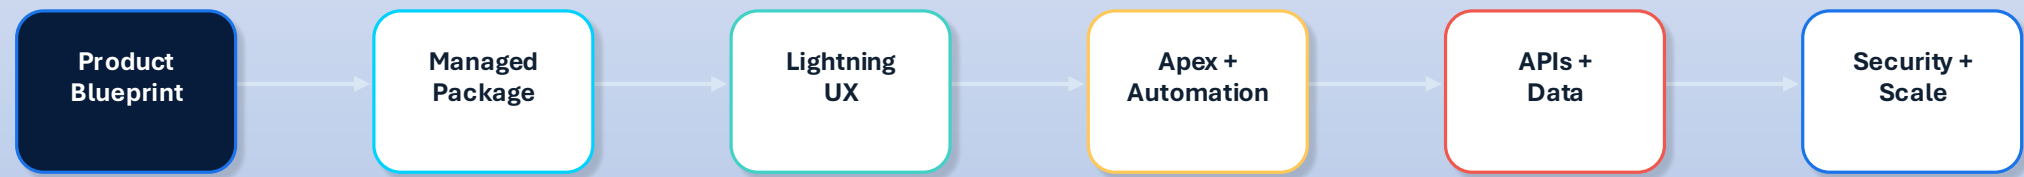

One partner for Salesforce transformation, digital products and operational scale.

Salesforce App Development Expertise

From product vision to AppExchange launch, Adoptforce builds secure, packaged, extensible Salesforce applications.

Architecture pattern

- Custom AppExchange Apps
- Managed Packages
- Lightning Components
- Apex Development

- API Integrations
- Secure Architecture
- Scalable Data Model
- Release Governance

GTM + REVOPS ACCELERATION

Go-To-Market Strategy Services

Adoptforce aligns product, pipeline and CRM execution so teams launch faster, see opportunities clearly and scale repeatably.

Outcome: faster launch execution, stronger customer acquisition motion and cleaner CRM performance signals.

Mobile App Development Solutions

Mobile-first strategy and Salesforce-integrated experiences for enterprise teams, field operations and digital products.

1

Mobile-first strategy

Design journeys around the user in the field, on the go and at the point of service.

2

CRM on mobile

Bring opportunities, cases, approvals and dashboards into a secure mobile experience.

3

Real-time data sync

Connect Salesforce, APIs and cloud backends with reliable sync and governance.

4

Secure architecture

Role-based access, push notifications, encryption and app lifecycle controls.

Native | Hybrid | Cross-platform | Offline-first | Salesforce Mobile SDK

Digital Transformation Approach

A pragmatic delivery framework to discover value, shape the roadmap, build with confidence and scale intelligently.

Discover

- Business goals
- Systems audit
- Stakeholder needs

Strategize

- Roadmap
- Architecture
- Operating model

Build

- Agile delivery
- Quality gates
- User enablement

Scale

- Automation
- Managed services
- Continuous value

Every phase is tied to business outcomes: speed, adoption, data quality, revenue visibility and operational efficiency.

Technology Stack

A modern Salesforce-centered engineering ecosystem for enterprise-grade digital products and integrations.

Salesforce Ecosystem

AI + Automation

AI Tools

Einstein AI

Workflows

Automation

Analytics

Built to connect CRM, cloud, mobile and AI into one scalable architecture.

Industries Served

Flexible consulting and engineering capabilities for regulated, high-growth and operations-intensive environments.

H

Healthcare
Care coordination, service workflows, compliance-ready data

F

FinTech
Secure customer onboarding, revenue operations, analytics

S

SaaS
AppExchange apps, product engineering, GTM operations

R

Retail
Customer 360, service automation, mobile commerce

L

Logistics
Field mobility, real-time operations, integrations

M

Manufacturing
Quote-to-cash, partner portals, service visibility

E

Education
Lifecycle engagement, digital experiences, support

I

Insurance
Policy workflows, agent portals, claims automation

Salesforce + product engineering patterns adapted to each market and operating model.

DIFFERENTIATORS

Why Choose Adoptforce

Enterprise-grade delivery with the agility to help teams launch, learn and scale without slowing the business.

40+

satisfied clients

100+

projects successfully delivered

400+

years combined experience

End-to-end ownership

Strategy, architecture, development, adoption, support and continuous value optimization under one operating model.

Salesforce expertise

Certified delivery patterns across clouds, configuration, custom development and integration.

Faster time-to-market

Agile execution, reusable assets, focused MVP thinking and launch discipline.

Scalable architecture

Secure data models, API-first thinking and extensible cloud/mobile products.

Support model

Managed services, training, release support and continuous improvement ownership.

Client-focused. Innovation-driven. Built for long-term partnership.

Case Studies / Success Stories

Representative example engagements that show how Adoptforce converts business challenges into scalable Salesforce outcomes.

SaaS AppExchange Launch

Challenge

New SaaS product needed packaged Salesforce distribution and faster launch readiness.

Solution

Managed package, Lightning UX, Apex services, API integration and security review prep.

Impact

MVP launch-ready in 12 weeks; scalable packaging model; reduced implementation effort.

GTM + CRM Optimization

Challenge

Sales leadership lacked pipeline visibility, clean lead routing and unified RevOps reporting.

Solution

CRM redesign, automated lead management, dashboards and sales enablement workflows.

Impact

Clearer forecasting; improved response discipline; repeatable acquisition engine.

Mobile Field CRM

Challenge

Field teams needed secure CRM access, offline workflows and real-time operational updates.

Solution

Mobile app with Salesforce integration, push alerts, offline sync and role-based access.

Impact

Faster field data capture; fewer manual updates; stronger customer service responsiveness.

Note: examples and impact metrics are illustrative and can be replaced with named client results during final review.

Engagement Model

Flexible partnership models that meet clients where they are: advisory, augmentation, end -to-end delivery or long-term support.

1

Dedicated Teams

Persistent cross-functional pods aligned to product, CRM or transformation roadmaps.

2

Staff Augmentation

Salesforce architects, developers, admins, QA, UI/UX and mobile resources.

3

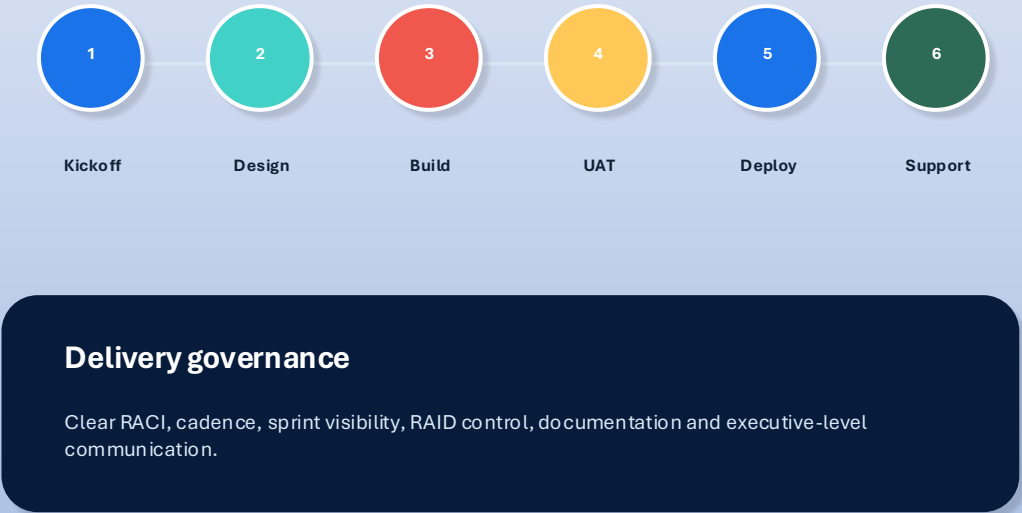

End-to-End Delivery

Discovery through deployment with governance, sprint cadence and quality gates.

4

Consulting Partnership

Strategic advisory, architecture, GTM/RevOps and roadmap acceleration.

Flexible enough for pilots; rigorous enough for enterprise transformation.

WHERE WE ARE HEADED

Future Vision

Adoptforce is positioned to help clients move from CRM systems of record to intelligent systems of action.

AI innovation

AI-assisted service, sales intelligence and automation design patterns

Next-gen CRM

Composable experiences, smarter data models and unified customer journeys

Intelligent automation

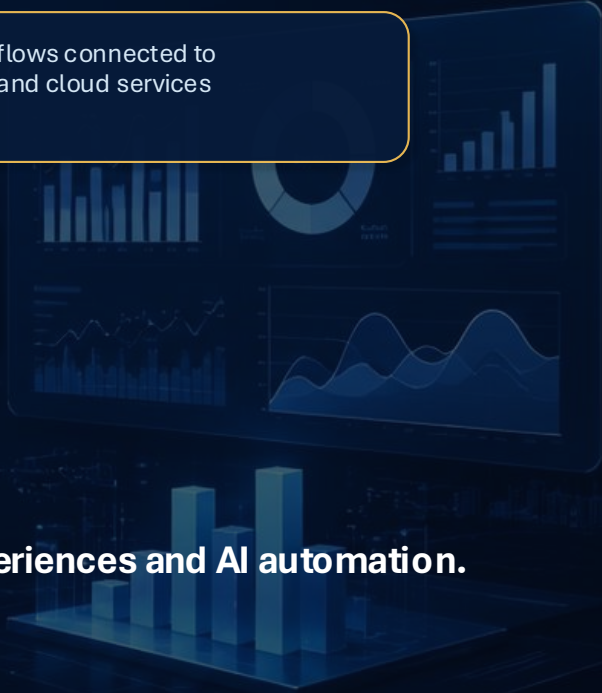

Autonomous workflows, alerting, routing and process optimization

Enterprise mobility

Mobile-first workflows connected to Salesforce, APIs and cloud services

Data-driven growth

Decision-ready analytics, RevOps dashboards and performance loops

The next wave of enterprise value will be created at the intersection of Salesforce data, mobile experiences and AI automation.
